

Univ of D

Our core mission at the University of Dundee is to transform lives, locally and globally, through the creation, sharing and application of knowledge.

We are doing that in all sorts of ways. The teaching we offer forms part of a student experience that is consistently rated among the best in the UK, and is producing graduates who are ready to help solve real-world problems and become future leaders across society.

We carry out research that has a real impact on people's lives, here in Scotland and around the world. We are focused on shaping the future through innovative design, promoting the sustainable use of global resources, and improving social, physical and cultural wellbeing.

Find out more about us through these pages or come and visit us to experience Dundee for yourself.

Geography and Environmental Science has never been more relevant to our daily lives.

You will tackle challenging questions about human and physical environments, from global issues such as climate change to local issues such as urban regeneration.

Our environmental disciplines and engagement with practice is exceptionally strong, which provides exciting opportunities for you to flourish.”
