

University Centre Sparsholt (UCS) is Sparsholt College's Higher Education offering, validated by The University of Portsmouth. Sparsholt has been offering Higher Education since the late 1970s and has worked with the University of Portsmouth, its validating university, since the early 1980s.

The designation of university centre allows the College to convey more clearly the quality and standards associated with these courses and differentiates them as university level programmes which was further consolidated by its achievement of a [Teaching Excellence Framework \(TEF\)](#) Gold award in June 2018.

UCS's specialist courses ranging from FdSc to MSc, are taught by expert tutors and provide excellent research opportunities, practical experience and essential industry links to give students a head-start in their dream career. The University Centre currently holds an impressive 89% overall student satisfaction rate (NSS 2019) proving testament of the benefit of its outstanding facilities, small class sizes and likeminded student community.
